In response to your question in Section V of Reference:

1. The Directorate of Operations (DO) conducts annually an inventory of its information system. The results of that inventory are reported formally to the Agency Records Management Officer and by him to the Archivist of the United States.

2. The DO reviews annually its program of information management activities including planning, budgeting, organizing, directing, training, promoting, controlling and other activities involving the use and dissemination of information. The results of this review are reported formally in the annual program submission to the DDO and incorporated in the annual Agency program. Further, the Directorate carries out through its records management officer system a continual review of its information systems to ensure that those systems do not overlap and that they are in compliance with Federal laws and regulations.
